

Table 1: Two-way ANOVA tables for columnar and tentacular variables of the study. Displayed p-values have been adjusted with Benjamini-Hochberg correction. SOD: superoxide dismutase; CAT: catalase; GPx: glutathione peroxidase; GR: glutathione reductase; GST: glutathione-S-transferase; NQO1: NAD(P)H quinone oxidoreductase 1; TEAC: trolox-equivalent antioxidant capacity; MDA: malondialdehyde; ACP: acid phosphatase; ALP: alkaline phosphatase; MPO; myeloperoxidase.
